

Press Release

Serbia: the City of Belgrade renews its Partnership with RATP Dev for its Future Automated Metro System

Paris, March 3, 2025 – The City of Belgrade has renewed its trust in RATP Dev, a subsidiary of RATP Group, by extending its “Early Operator Assistance” contract for the upcoming three lines of the Belgrade automated metro system. The parties have also signed a Memorandum of Understanding that outlines the broader scope of collaboration.

These renewals will allow RATP Dev to continue to provide comprehensive support to Belgrade’s Secretariat for Public Transport and BMV (Beogradski Metro i Voz) in developing the city’s first metro network and future public transit network. This is a pivotal project for Belgrade, aiming at modernizing its transport infrastructure and promoting sustainable urban development.

Through this partnership, RATP Dev will continue to contribute its extensive international experience and expertise in operations and maintenance to support the functional design and specifications of Belgrade’s future metro system. The early operator assistance contract covers topics such as operations and maintenance, safety, passenger experience, and life cycle cost optimization.

For **Mehdi Sinaceur, Deputy CEO of RATP Dev**: “We are honored to earn BMV’s trust. This signature exemplifies the effectiveness of our collaboration and the strength of our long-standing partnership. With our cumulated experience in cities such as Paris, Lyon, Riyadh, Sydney, Singapore and Doha, we are committed to delivering a modern and efficient automated metro network for Belgrade. This project will enhance residents' quality of life by providing a more sustainable mode of transport.”

Belgrade’s ambitious fully automated metro network project comprises Line 1 (21.8 km, 21 stations), Line 2 (24.2 km, 26 stations), and Line 3 (23 km, 22 stations). This project stands as the largest and most significant infrastructure initiative in the Republic of Serbia today.

About RATP Dev

RATP Dev is a subsidiary of the RATP Group, global leader in high-capacity urban rail and the world's third largest public transport operator. All over the world, our 21,000 people design, operate, maintain and modernize public transit networks of automated metros, commuter rail, tramway, bus and many other modes.

We have forged our expertise in the ultra-dense, constantly-modernized Paris network. For 125 years, our experts have managed complex projects, improved the passenger experience, and participated in major sporting and cultural events.

Thanks to this unrivalled know-how, we serve more than 100 cities in 16 countries and 5 continents. We provide custom-made solutions that meet their specific challenges in terms of the environment, social inclusion, growth or attractiveness.

We build, deliver and commit for the best of public transport, every day, everywhere, for everybody – to make it the natural choice for cities and passengers.
